- Applicant's canceling of claims 1 and 23 in the amendment/response submitted on 2/17/05 is acknowledged.

Reason for Allowance

Claims 2-22 are allowed for the following reasons:

The instant application is deemed to be directed to a nonobvious improvement over the invention patented in Pat. No. Lin et al. (US 2001/0012149).

Claim 2 is allowed because the prior art of record, taken alone or in combination, fails to disclose or render obvious $2 \leq |(\Delta\lambda/\lambda_0) / (\Delta\omega / \omega_0)|$ in combination with the rest of the limitations of the base claim.

Claim 3 is allowed because the prior art of record, taken alone or in combination, fails to disclose or render obvious wherein the photonic crystal includes a periodic direction and said at least either one of the input medium and the output medium comprising the photonic crystal, includes end surfaces perpendicular to the periodic direction of the photonic crystal as an input surface and an output surface, the photonic crystal includes a photonic band gap and a photonic band in the vicinity of the photonic band gap, and the electromagnetic waves entering the input surface are propagated by the photonic band in combination with the rest of the limitations of the base claim.

Claims 4-8 are allowed because the prior art of record, taken alone or in combination, fails to disclose or render obvious wherein the photonic crystal includes end surfaces from which the periodic characteristic is exposed as an input surface and an output surface, a photonic band structure having a line, which is either a Brillouin

zone boundary line or a central line, and a photonic band, and light waves entering the input surface are propagated by one of the photonic band, which exists on the Brillouin zone boundary line of the photonic band structure or in the vicinity of the Brillouin zone boundary line; and the photonic band, which exists on the central line of the photonic band structure or in the vicinity of the central line in combination with the rest of the limitations of the base claim.

Claims 9-16 are allowed because the prior art of record, taken alone or in combination, fails to disclose or render obvious wherein the photonic crystal has an end surface, which includes a reflective diffraction grating that comprises said diffraction grating, and when electromagnetic waves including plural frequency components are input to the photonic crystal, the reflective diffraction grating produces diffracted wave for each of the plural frequency components of the electromagnetic wave in different directions in combination with the rest of the limitations of the base claim.

Claims 17-22 are allowed because the prior art of record, taken alone or in combination, fails to disclose or render obvious an array waveguide diffraction grating including an input slab waveguide connected to the input waveguide, an output slab waveguide connected to output waveguide, and an arrayed waveguide connected between the two slab waveguides and generating an optical path length difference, with the arrayed waveguide comprised of the photonic crystal as the diffraction grating that periodically divides electromagnetic waves and produces a phase difference in the wave fronts of the divided electromagnetic waves in combination with the rest of the limitations of the base claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
